

EASY INSTALLATION • MAINTENANCE FREE

Available with wood-grain.

Poly Lumber decking is constructed of over 90% high density polyethylene, no wood fillers. It is an ideal, low maintenance, long lasting replacement for traditional wood products.

Poly Lumber features:

- Can be purchased with a slip resistant surface with natural wood-grain appearance
- Available in tongue and groove or square edge design
- Won't splinter, check or rot
- Cuts and shapes like wood
- Superior color retention
- Resistant to insects and termites
- Contains no harmful chemicals
- No trees or wood involved
- Does not require pre-drilling
- Not intended for structural applications

Poly Lumber is available in a wide variety of colors (see side two). Ask your dealer for a complete list of color choices.

DECKS • LAWN FURNITURE • BIRD FEEDERS

Poly Lumber

More versatile than wood for all of your craft projects.

Poly Lumber is derived from post-consumer polyethylene bottle wastes such as milk containers. This material is cleaned in a decontamination process to a purity level of over 99% HDPE. It is then compounded into rigid board stock material, the resulting finished product containing over 90% recycled post-consumer waste by weight. Because Poly Lumber is a recycled product, there can be slight variations in color.
